SciDyn Holds Annual Meeting of Shareholders

Cherry Hill, NJ – (November 27, 2000) – Science Dynamics Corporation “SciDyn” (NASDAQ:SIDY), a leading developer of Internet Protocol-based (IP) telephony solutions and services, has announced the results of its Annual Meeting of Shareholders held on Wednesday, November 15, 2000 at the Radisson Hotel in Cherry Hill, New Jersey.

At the meeting, Joy Hartman, President of SciDyn, outlined the past year’s key accomplishments. Highlights of the discussion include:

- **Personnel** – Key additions to SciDyn’s management, sales, and engineering teams.
- **Distributor Contracts** – Progress made, and the signing of key distributor contracts, with Telecommunications & Security Systems Ltd. (“TSSL”) in Hong Kong, and with Information Technology Services (“ITS”) based in the United Kingdom.
- **Customizable Customer Support** – The completion of a profit call center to provide customer support, and an NOC (Network Operations Center) – a scalable service that monitors customers’ networks in order to detect and quickly correct problems as they arise.
- **Total Solution Sets and Bundled Target Offerings** – Larger solution providers are bundling vendor products to provide total solution sets at a targeted market. This provides SciDyn the opportunity to open indirect, OEM, and channel relationships thereby broadening the company’s global reach and strengthening service and support efforts through a worldwide partner network.

Commenting on the meeting, Joy Hartman said, “The Annual Meeting provided a forum for the affirmation of our continued commitment to shareholders, and to our strategic direction as a company. I was able to discuss both our recent accomplishments and our goals for the future - including our continued focus on the diversification of customers, product and service offerings, and the expansion of both our vertical market focus and sales and marketing channels. For example, one of our key initiatives for the future will be to continue to leverage our industry experience and unique position within the marketplace as we continue to develop product and service offerings. In short, I am confident that we now possess the technology, the leadership, the commitment, and the processes that will position our company to achieve continued success as we strive to recognize both our near and long term growth initiatives moving forward.”

Headquartered in Cherry Hill, New Jersey, Science Dynamics Corporation (SciDyn) is a leading developer of telecommunications solutions. SciDyn’s IP telephony products enable the seamless connection between traditional circuit-switch based networks and the next generation of packet-based networks. Products include the Intelligent Integrator Series of IP Telephony Gateways, the Commander II Inmate Control phone system (also
